It's time to ... Celebrate!

As the 2006-2007 school year ended, Butler students and faculty alike realized this year would be different. The year, the school had a sesquicentennial celebration - it was turning 150 years old.

Over the course of the year, nearly every event was about or somehow related to this celebration. The festivities began early in the year with a groundbreaking ceremony to mark the construction of a new football field, a new apartment complex, and a new health and wellness center. Later that same day, Butler hosted a birthday party on the mall, inviting the Indianapolis community to join in the fun.

The celebration did not end there, however - it continued throughout the year, including a variety of unique events and bringing a number of guest speakers to the campus, including former U.S. Presidents Bill Clinton and George H.W. Bush. Festivities and ways of celebrating were so frequent that within the first couple of months of the school year, it was impossible for any student to mispronounce "sesquicentennial" or forget the meaning of the word.

Welcome Week

The new freshman class was welcomed to Butler University during Welcome Week with informative discussions about campus life and social activities, to help ease students into college life. The Welcome Week Tent and Resource Fair helped answer any questions students may have beginning their college careers. From the services that were available to fun and meaningful activities they may want to be a part of, this event had something for everyone. Some of the other activities that were scheduled were Payfair, Casino Night, Bulldogs Into the Streets, Pool Party, and a Hypnotist performance.

For the new students, these events were the start of the formation of new relationships and experiences that may last beyond their college life. For returning students, it is a way to get reacquainted with the campus and re-establish the relationships that they had created in previous years.

Homecoming Week

Homecoming Week, coupled with the sesquicentennial anniversary, proved to be a unique and memorable time for Butler students, faculty and alumni.

The week included many of the traditional Butler Homecoming activities, like the "Yell Like Hell" competition, but included a variety of new activities for students, too.

A special highlight was the appearance of several celebrity guest speakers. On Oct. 13, George Will and Bill Bradley made an appearance at Clowes. The following day, Anna Quindland and David Halberstam spoke at Clowes along with Butler alumnus, author Mark Kurlansky.

On Saturday, students and alumni could participate in a new event called the College Festival. Then, following the football game, there was a dinner dance. Elvis Costello also performed in a concert on campus.

ABOVE: The 'large blow-up' bulldog is brought out for special occasions. It always appears during Homecoming. Photo by Emily McInerney.

LEFT: Butler's marching band and flag corps entertain the crowd just before the big game begins. Photo by Emily McInerney.

Homecoming Day

Homecoming Day was action-packed from beginning to end. With activities for the students and alumni, everyone had something to do.

The honor of Homecoming King and Queen were bestowed upon seniors Warren Morgan and Katie Goeke, respectively.

Oct. 15 Homecoming Day began with a chariot race between Sigma Chi and Phi Delta Theta. Sigma Chi was the winner of this race on Hampton Drive. This was followed by the Sixth Annual Butler Bulldog Beauty Contest held on the Cowes Mall. The Homecoming Parade began at noon on a path from Fairbank's Center to Hinkle Fieldhouse which led to the main event, the football game at the newly-renovated Butler Bowl!

An ongoing event of Homecoming was the College Festival on the main mall. It took place from 10 a.m. to 1 p.m. so that people could stop by between other activities around campus. At the festival each college had a tent where alumni gathered to chat it up with former classmates and professors.

Construction

In the spring of 2005, construction began on the areas near Hinkle Fieldhouse. Starlight Theatre was demolished and the Tennis Bubble was relocated to accommodate the construction. In August 2005, just before the Butler Birthday Party, a groundbreaking ceremony was held. In the place of the Tennis Bubble, a state-of-the-art athletic facility was to be constructed. Near the Dance Academy and the Butler Bow, an Apartment Village was already being constructed.

Only Juniors and seniors will be allowed to live in the Apartment Village. Students will live in pods of four apartments with four students to each apartment. In the Apartment Village is a convenience store, and laundry facility. The entire Apartment Village will be composed of 12 buildings. Eleven of the buildings are composed entirely of apartments. The convenience store and laundry facility will be housed in their own building, called the Dawg House. Applications for the housing village began to be accepted on Oct. 31, 2005. By the time students left for the 2005 Thanksgiving break, over half of the apartments were filled.

The Athletic Facility will house two pools, a basketball court and an indoor jogging track.

Sesquicentennial

On Nov. 1, 1855, Butler University was founded under the name of the North Western Christian University at a mere \$300 per year. It was divided into six schools: English, Mathematics, Classics, Natural Science, Intellectual Science, and Law. From this date, Butler grew to the established academic institution that it has become today.

Over the years, Butler has undergone many changes. In 1862 Dena Butler was the first woman graduate. Butler moved to its current location in 1875. However, the school was not renamed Butler University until two years later. In 1924, the College of Religion was established. Two years later, in 1926, the official Butler war song was penned. In 1928 the historic Hinkle Field house was constructed. Butler established an admissions firm and hired recruiters to boost admission after the Great Depression in 1931. In 1937 the current College of Business was founded. The College of Pharmacy was created in 1945. A few years later in 1951, Jordan's College of Music, which later became The Jordan College of Fine Arts was established. Two years later, the largest telescope in Indiana was constructed and housed in the new Holcomb Observatory to commemorate the 1955 centennial celebration. In 1954, Ross Hall was built. Two years later, Schwitzer hall was constructed. The Cannon Bell tower was erected in 1959 in memory of Mrs. Holcomb. 1963 included many changes to Butler as both Irwin Library and Clowes Memorial Hall were built. Butler made history in 1963 as its first female dean took office. Residential College was added to Butler's campus in 1989. Three years later, in 1992, WTBLL, a television station and later radio station, became a part of Butler's campus. In 1997, Butler made history again as the Hampton House was created. At the time, the Hampton House was only the second house in the world to be dedicated to servant leadership. Butler's current President, Bobby Fong took office in 2001.

President Bobby Fong speaks about Butler's sesquicentennial at students' homecoming event.

Sesquicentennial

In 2005, Butler University celebrated its 150th birthday. The celebration kicked off in September 2005 at Butler's Birthday Party. The party consisted of many booths or festival games that students of all ages could enjoy. The party also included a massive cake and was open to the entire Butler/Fairlington Community. The celebration continued with special homecoming events. In addition to the traditional homecoming celebrations, this year's homecoming introduced a College Festival where alumni could visit tables hosted by all of the colleges and many of Butler's student organizations.

Throughout the year, speakers will visit campus to help Butler celebrate this monumental occasion. Sesquicentennial speakers include former Presidents Bill Clinton and George H.W. Bush. Butler's sesquicentennial celebration is scheduled to continue through Homecoming 2006.

celebrating its 150th birthday, the school's 150th anniversary. The celebration is scheduled to continue through Homecoming 2006.

STUDENT VOLUNTEERS AT THE HOME FOR THE AGED, NEW YORK, N.Y.
 Before the first disaster, young people were not as active in community service as they are today. But after the September 11 attacks, many students began to volunteer. In the photo above, the Bronx High School of Music students, who participate in the Alternative Disasters Training Program, are working on the exterior of the Home for the Aged. The students are working on the exterior of the building, which is in need of major repairs. The students are working on the exterior of the building, which is in need of major repairs. The students are working on the exterior of the building, which is in need of major repairs.

Alternative Breaks

All Butler University students were invited to participate in Fall Alternative Break (FAB) and Alternative Spring Break (ASB), sponsored by the Volunteer Center. Each year a site is chosen to improve the living conditions of the particular site's community. Instead of going home or relaxing over their break, these students have given a hand to those in need. Students experience new social bonds as well as personal growth from these excursions. The students provide hands on manual work to help out at the site. For Fall Alternative Break students went to Neon, Kentucky from Oct. 5 through Oct. 9. Between March 9 and March 14, Butler students went to Pass Christian, Mississippi to help the community clean up after the destructive effects of the Hurricane Katrina.

Formal Rush

Each January, we welcome the new semester as students and staff of Butler students return to campus. However, they don't come back to get a head start on studying. They are prospective "Greels." They return to campus for formal recruitment into the Greel system.

On the last day of Rush week, all of the students meet in the Rely Room to find out which Greel house they can now call home. Then the real fun begins. The students race out of the Rely Room and down West Hampton Drive to meet their new brothers or sisters for the first time.

Once the prospective Greels are initiated, they can begin to help their sorority or fraternity plan all campus events that support the house's charity of choice.

Two of the new Greels, Kaitlyn Smith and Kaitlyn Smith, posing for a photo. Photo by Chris Gray.

At the end of the rush week, the students are given a chance to see the Rely Room and the Rely Room is a great place to see the Greel house and the Rely Room is a great place to see the Greel house and the Rely Room is a great place to see the Greel house.

Student Chill

During their free time, students participate in a variety of relaxing activities. With all of the stress of school, students often need to escape, which is what brings them to their "fun" time. There is even a group on campus called Chill Nite! So lean back, take a break, and enjoy what little time you have to relax!

ABOVE: Several students hang out while attending a performance. Photo by Emily McInerney.

LEFT: Sophomores and roommates Hilary Brown and Niky Gamen hang out in their room while doing a little bit of studying. Photo by Sarah Amos.

Many of the children and adults who participated in the "Art Day" event were from the local community. The children were given the opportunity to express their creativity and imagination by creating their own artwork. The adults were also encouraged to participate in the event and to help the children with their projects. The event was a great success and the children and adults had a wonderful time. The artwork created by the children will be displayed in the school hallway and the adults' artwork will be displayed in the community center. The event was a great way to bring the community together and to promote the arts in the school and the community.

Greek Philanthropies

The many Greek houses on campus are not only active parts of Butler's community, but they also do many philanthropic deeds. Each house selects a philanthropy and then hosts at least one a campus event to try and raise money for that charity.

Tau Kappa Epsilon, for example, holds a Jump-a-Thon each year. In this event, the TKE brothers jump on a trampoline 24 hours a day for a week in order to raise for the Alzheimer's Association.

The girls of Kappa Kappa Gamma host an a campus football tournament every fall. The Kappa Kick-off not only starts the school year off on the right foot, but it also raises money for the Colum place.

Student Study

Whether it be in the Starbucks, a dorm room, or the old, old campus, or at the cliché library, students are always studying. Some utilize a quiet area, while others cannot do it without a group of friends or classmates. Others like to listen to music or even work out while reading. The point is that all students have to study. As many students tend to forget, they are here to learn, which encompasses the act of reading, highlighting, writing, and memorizing. As it tends to get boring, the students here liven up the basic activity attempting to make it bearable for the next two, three, four, or even five years.

Following the introduction, the Prime Minister and the President of the European Council, Jacques Delors, address the guests. The President of the European Council, Jacques Delors, then introduces the President of the European Council, Jacques Delors, and the President of the European Council, Jacques Delors, to the guests. The President of the European Council, Jacques Delors, then introduces the President of the European Council, Jacques Delors, and the President of the European Council, Jacques Delors, to the guests.

Top 100 Students Banquet

Each year, students are nominated to be one of the top 100 students by faculty and other students. The students are then asked to submit an application. A selection committee reviews the applications and the nomination forms and officially decides on the top 100 students. The top 100 students are then allowed to review the application packets in order to help the selection committee pick the top ten male and female students.

Finally, near the end of the spring semester, a banquet is held to honor all of the students for their outstanding work. Families are invited to the banquet as well. The top ten male and female students, the outstanding male and outstanding female student are announced at the banquet. Last year's outstanding male student, Todd Bolster, introduced the top ten female students. The outstanding female student of 2005, Angie Bong, introduced the top ten male students. This year's outstanding male student is senior Cliff Rateke. This year's outstanding female student is senior Jessica Sims.

Below is a photo of the selection committee welcoming the students and their families to the banquet. Photo contributed.

Commencement

Every year ends with a beginning. Commencement is arguably the most important event in any given school. But Commencement is not just an opportunity for seniors to look ahead. In many cases it is a chance to look back on the time they spent at Butler. This is especially true for the class of 2006.

Before the degrees are conferred, several speeches are made during the Commencement exercises. The first of these is made by the President of the Senior Class. This year's class president, Chris Jensen, shared his impression of his time at Butler.

This year's Faculty Address was given by Dr. Tara Lineweaver, of the Psychology Department. Dr. Lineweaver joined Butler's Faculty three years ago. She looked at her speech as a way to teach just one more lesson to the Class of 2006.

This year, Dr. Fong conferred two honorary degrees: Dr. Frank Levinson, class of 1975, received an honorary Doctorate of Sciences. Author James McBride received an honorary Doctor of Letters. McBride also served as the guest speaker. He had previously addressed the class of 2006 during their Freshman Orientation, after they had read his bestselling book, "The Good Lord Bird."

The ceremony ends with Dr. Bill Berry, Butler's Provost, presenting the Class of 2006. Finally, the deans of each of the colleges confer the degrees upon the Class of 2006.

Author James McBride, President of the Class of 2006, receives his honorary degree from Dr. Bill Berry, Butler's Provost.

ACADEMICS

College of Pharmacy and Health Sciences

September 2011: Students take through the notes during a pharmacy lecture class modeled by Hal Gillette of EMV University.

Professor instructs a group of the Pharmacy classes. Professor Emily McHenry.

Butler University's history began in 1862 when the first class of students began their studies. The college was founded in 1904, but only shortly after the Institute's founding, the pharmacy department grew such that it separated and became the Indianapolis College of Pharmacy. In 1945, the Indianapolis College of Pharmacy and Butler University partnered and a new building was erected on Butler's campus to house the joining college. The College of Pharmacy became the College of Pharmacy and Health Sciences when a Physician's Assistant program was added in 1995.

The College of Pharmacy and Health Sciences has not always been a part of Butler University. The Indiana Technical Institute was founded in 1904, but only shortly after the Institute's founding, the pharmacy department grew such that it separated and became the Indianapolis College of Pharmacy. In 1945, the Indianapolis College of Pharmacy and Butler University partnered and a new building was erected on Butler's campus to house the joining college. The College of Pharmacy became the College of Pharmacy and Health Sciences when a Physician's Assistant program was added in 1995.

Students in the College of Pharmacy and Health Sciences enjoy a 100 percent job placement after graduation. The College of Pharmacy and Health Sciences at Butler is renowned for its prestige. Many students choose Butler because of this college.

However, one aspect of the college that students like that is less often talked about is the dean.

"We have a super - awesome dean," said senior Elizabeth May. "She's very encouraging (and) easy to talk to if you have problems."

May credited part of the success as a dean to Patricia Chase's ability to be personable; she often knows the names of each student in the college by the time they reach the professional part of the program their junior years.

"She knows it's challenging and she's very encouraging," said senior Christina Rappin. "She makes it seem like she wants to help us."

Chase decided to leave Butler at the end of the school year.

What if you could learn to teach in a way that is more effective than the traditional way? What if you could learn to teach in a way that is more effective than the traditional way? What if you could learn to teach in a way that is more effective than the traditional way?

The College of Education at Butler University is an excellent program for preparing future teachers, whether elementary or secondary education. The College of Education boasts a 100 percent job placement for graduates who earn their teaching certificate and pursue a career in teaching.

The College of Education has an excellent reputation. Students are quick to note that COE has a lot of positive attributes.

"Overall, I think that the College of Education is great because Butler's reputation is first-class in the world of education," junior Miller Tetrault said. "Especially in the Indianapolis area, there are so many opportunities for students to get involved and active. My favorite part of COE is the other majors that make classes enjoyable. Even when there is a lot of work to get done, the other people in the class make the experience positive."

Some students in the College of Education do see some minor flaws with the program.

"On the negative side, I think much of the coursework is redundant- there are several series of classes that could easily be condensed into a single course," Tetrault said. "Also, there are so many short papers that they don't really accomplish much."

However, many students have positive experience with COE.

"Overall, though, I have been pleased with the COE and I feel very well-prepared for a career in teaching," Tetrault said.

program. Photo by Emily McInerney.

The College of Business Administration at Butler University strives to show students the "big picture" of the working business world. The college offers an "Executive-in-Residence" program where retired business professionals help in the classroom, offering students a chance to learn what it is like in the working world as well as theoretical knowledge. The College of Business Administration is also very much aware of the value of networking in the business world and offers students many opportunities to make connections with people that will be able to assist them after graduation. All first year business students are assigned to a career mentor who helps them during their time at Butler. Often these connections will serve as great networking tools after graduation.

The College of Business Administration hosts scholars from around the world to help globalize Butler's business majors. CBA's more than 35 faculty members strive to teach their students the most current information in their field.

The College of Business Administration has been accredited by the Association to Advance Collegiate Schools of Business, the AACSB. This is a rare honor for a business college which only 15 percent of business schools around the world can claim. Butler's CBA is nationally recognized for their excellence.

At the bottom: Student Brian Chen and trumpet player, David Brown. At the top: Stage manager, Patricia Brown.

At the bottom: Student Brian Chen and trumpet player, David Brown. At the top: Stage manager, Patricia Brown.

For students involved in the Jordan College of Fine Arts, it's all about the experience. They're not just learning to play an instrument or sing, they're learning to be a professional. They're learning to be a team player. They're learning to be a leader. They're learning to be a part of something bigger than themselves.

"It's like you're gonna 20 hours a week, it's like you're gonna 20 hours a week," senior Brian Chen said.

For many the school offers a variety of ways to get involved.

"JCFA is just a wonderful opportunity for us," freshman Philip Chen said. "There's a lot you can do."

Students also enjoy the friendly environment of the college.

"What I like about it is everyone's really nice," senior Sainantha Srebrige said. "The faculty know all the students and each other. It's a lot of camaraderie. It provides a really good environment for music-making."

Senior Molly Wood agrees. "Everybody's friendly."

Students also enjoy the camaraderie and the opportunity they have to work with different students.

"We have a lot of friends. These students are always a joy to hang out, interact, and share the music. Art and life," senior Sainantha Srebrige said.

For many, JCFA is more than just a school. It's a home.

"I've gotten as much out of this school as what I expected," graduate student Todd Kaufmann said.

The world is an oyster for students in the Liberal Arts and Sciences College at Butler University. With more than 30 majors and more than 100 staff members, LAS majors are encouraged to be creative, research and learn beyond their majors. With that in mind, over 75 percent of LAS majors complete an internship before graduation, serve as volunteers and participants in service-learning projects, and travel abroad all over the world. All of this while completing the necessary course work for graduation!

LAS students are also able to take classes beyond their major, like in foreign languages, gender studies, international studies, and in urban affairs. Students are encouraged everyday to use what they learn in the classroom and apply it to real life situations. Students can also learn outside the classroom. Via the Visiting Writers Series, which this year brought authors Nick Hornby and Chris Abani to campus, and through numerous opportunities provided by the city of Indianapolis, LAS students come to Butler with a passion to learn and a desire to succeed.

The LAS college at Butler is designed to fit the needs of Butler students, who come from 48 states and 52 countries. The average day for LAS students takes them from their psychology lecture in the morning, to their Chinese class before lunch, to their class on politics in Latin America and finish with a lecture on literature in developing countries. Life is never boring in Jordan Hall, home of the Liberal Arts and Sciences College. Then again, life is never boring for LAS majors, either.

The liberal arts and sciences college at Butler gives students the chance to excel with small class sizes. Photo contributed.

Eight students participate in the debate course in Butler's debate program. Photo contributed by Jordan Hall.

Liberal Arts College Butler offers a variety of opportunities to students. Photo contributed by Jordan Hall.

All about LAS:

-LAS college at Butler has 15 departments with over 35 majors

- The average class size is 21

-40 percent of LAS majors after graduation go on to pursue post graduate studies, while the other 60 percent enter into careers

Below: Students doing a presentation. Photo by Emily McInerney.

All Butler students, in order to graduate, are required to complete the Core Curriculum, a set of classes designed to represent diversity in education. The curriculum is divided into five divisions: Humanities, Fine Arts, Social Science, Natural Science, and Quantitative and Formal Reasoning. The university offers a myriad of courses in each field, giving students the chance to choose. Students must also take classes in Public Speaking, Freshman Writing Seminars, and in *Change and Tradition* in order to complete the entire Core Curriculum. All students, no matter what college they are in, must complete the Core curriculum in order to receive a degree from Butler University.

There have been mixed views on the Core. Some students feel that the Core allows students an opportunity to take classes outside their majors and fields and breaks the monotony of their class schedules. Others feel that the Core Curriculum is a waste of their time, since they could be taking classes within their majors and focusing more on information that will effect their futures. Either way, Butler University feels that the Core is the best way for all Butler students to receive a truly liberal arts education.

In the next few years, the Core Curriculum will be undergoing many changes. One of the most talked about changes in the Core Curriculum is *Change and Tradition*, or *C&T*. Next year, the *C&T* program will be adding more classes to the program. The classes will cover South Asian civilization and Post-Colonialism. It will be interesting to see how the Core Curriculum changes over the next few years and beyond.

on the goal line

Derel North, Sophomore

"It was a disappointing season in terms of wins & losses. But being able to go out with your best friends everyday and being able to count on them is the best feeling. We have the right components to be good, it will be interesting to see how a new coach will make us the competitive team we can be."

Mike Marcotzko, Sophomore

"The season was disappointing to the team, the school and the community, but there were good things we did during the year that we need to take with us into next season and build upon."

Phil Buchan, Junior

"This season didn't go as planned for us, but it doesn't reflect the effort put forth everyday in practice. This program will get turned in the right direction. I hope all returning players, especially the seniors, realize this job is on our shoulders!"

Megan Carter, Junior
 "This season was very trying for us
 as a team, with all of our injuries.
 But in the end I could not have been
 more proud of the heart and inter-
 sity we played with to close out the
 season. All of the girls on this team
 are amazing and hardworking."

Mananne Schuing, Junior
 "This year we had the best team I've been on
 at Butler. Unfortunately, we were plagued by
 injury and were unable to show how much
 talent we had. I am looking forward to my
 senior season because I know that we have
 a group of talented girls who would do anything
 for each other."

Crystal Wright, Freshman
 "This season had all sorts of
 obstacles to overcome. More than
 anything they brought us closer
 together and in the end we knew
 we did all we could."

ORGANIZATIONS

SGA

Mat, Vanessa, and Jordan, members of the Student Government, are seen at the beginning of the year, wearing their chef hats and aprons, at the beginning of the year.

Student Government member, Matthew, is seen speaking at the beginning of the year, wearing his chef hat and apron.

Student Government Association

The Student Government Association is the student governing body at Butler University. The SGA serves as a forum for the expression of student opinion that seeks to promote the welfare and best interests of the student body. As the official student governing body, the Student Government Association is the liaison between students and faculty and administration members. Student Government Association promotes necessary academic and social policy reforms and budgets the funds from the student activity fee. The branches of SGA include R.E.A.C.H., Program Board, Grants Committee and C.R.A.

Business Clubs

Business students here at Butler have many opportunities to further their professional growth through the many organizations on campus. For instance, one of SABL's major projects is helping with the Butler Business Scholars weekend. Freshman Bethany Honer hosted a prospective student both weekends.

"I really enjoyed the weekend from the host perspective. It is always exciting to meet new students, especially since they are the future of Butler," she said.

Business students have many other opportunities such as Alpha Kappa Psi, the Accounting Club, the Actuarial Science Club and FTSSA. All of the Business organizations provide excellent networking opportunities.

Science/Math Clubs

Eric Wurth shoves a pie in the face of Tim Brown during an ACM party. Photo by Natalie Mega.

Some of the many organizations on campus allow students to express their interest in math and science. These organizations include the MAA Math Club, the American Chemical Society (ACS), the Society of Physics Students, and the Association for Computing Machinery (ACM). These organizations allow students to learn by interacting with each other, faculty and professionals in their field. For example, the MAA Math Club goes on an Annual Scavenger Hunt for local high school students. Through activities such as these, students learn much that will prove to be useful after college.

Vocal Ensembles

Brunel University is home to many vocal ensembles. Some are Freshly Brewed, Jubal, Jazz, Madrugada, and the Big House. University Chorale and Voices of Deliverance, just to name a few. University Choir is open to all students and does not require auditions. Most of the other vocal ensembles require auditions but are open to males and females in all years. There are many reasons why students join a vocal ensemble. A student may join because they find singing enjoyable, and another student might join because they would like prepare for their professional career in the music industry.

Instrumental Ensembles

Butler University offers a variety of ensembles, including Butler University Orchestra, Symphonic Band, Wind Ensemble, Jazz Band, Butler University's Orchestra and Percussion Ensemble. There are also athletic bands such as Butler University Marching Band and Baseline Band, which help cheer on Butler sports teams at home games. Many of the instrumental ensembles are by audition, but those who are not in OCA are still able to participate. For many students, this is a great way to meet new people, get involved with campus activities, and express their talent.

Ballet

The Department of Dance at Eastern University offers well-trained and accomplished dancers. These dancers perform in dance recitals, in a number of stages, in musicals and in operas. These opportunities not only provide entertainment for Eastern University but provide greater enjoyment for the audience. The Department of Dance offers many opportunities to students who wish to make dance their profession. This year, these students performed classical ballet in the Nutcracker, Sleeping Beauty, and new dances accompanied by Mozart's Piano Concerto, Divertimento in F and Piano Concerto #23. The Department also offers classes for children and adults, including ballet, and students at all levels of experience.

Theater

The undergraduate Butler Theater department is award-winning, which really showed this year. Some performances included "The Taming of the Shrew," adapted and directed by Diane Timmerman, "In-Tamer Tamed," directed by John Green, and "Twinto," directed by Nicholas Fardol. Senior theater majors also worked on their own writing projects, which included "Journet 29" and the "Farable of Law." Butler offers students involved in theater the opportunity to express themselves creatively and to learn the different styles and aspects that go into performing arts.

Health & Social Sciences

Butler University is home to many organizations that provide students with unlimited opportunities to get involved. These opportunities include a diverse academic focus and physical science majors.

Social science clubs like the Philosophy Club, the Student Sociological Association and Phi Chi are very active on campus. Most meet on a weekly basis and all of them hold events for their members and the Butler Community at large.

The physical sciences organizations such as the Pre-Health Club and the Pharmacy clubs and fraternities are also active on campus. For example, the Pre-Health Club meets on a regular basis and brings speakers to campus to help keep their members informed.

All of these organizations provide students with opportunities to get involved and express their ideas.

Publications

For a word and a rhyme, Bader would prefer how the artsy, colorful illustrations to go to the word. Finding it is publications that these creative souls can write for. *The Collegian*, the campus newspaper; *Flawiner*, which is based on an online version of the paper; and *The Gaery*, the annual yearbook. Not only does joining the staff of one of these publications serve as a venue for students to express and demonstrate their creativity, opinions, and writing ability, but also grants them the wonderful opportunity to get experience and to improve their skills for a future career especially if they are English or journalism majors. The publications also serve the needs of the whole campus as well by raising awareness of upcoming activities, events, and world issues.

Academic Organizations

Butler University is home to many organizations that promote excellent academics. However, these organizations also value service to Butler and the surrounding community.

Mortar Board is the academic organization that works hard to create the Gavel and values service to the community.

The National Society of Collegiate Scholars at Butler University, NSCS, requires a 3.4 GPA and a rank in the top 20 percent of their graduating class. However, service is a core value of NSCS. Members participate in several community service activities each semester.

Other academic organizations include groups like Alpha Lambda Delta and Phi Eta Sigma. All of Butler's academic organizations provide students with many opportunities to expand their horizons beyond the traditional academic setting.

Below: A member of the Campus Crusades for Christ band checks sheet music. Photo by Emily McInerney.

Above: A member of Campus Crusades for Christ expresses her thoughts on an important issue. Photo by Emily McInerney.

Butler University is home to many organizations that provide students with opportunities to express their faith in a safe and non-judgmental environment.

Venture, for example, hosts speakers weekly. These speakers present their thoughts on topics that effect the daily lives of college students. These events also allow students to discuss their opinions on important and current religious issues.

Other groups such as the Butler Catholic Community, Hill, and Campus Crusades for Christ hold frequent events that provide students with a safe religious environment. Many of these events are open to all Butler students.

Above: Campus Crusades for Christ speaks to the varsity during a meeting. Photo by Emily McInerney.

Special Interest Organizations

Butler offers a great variety of Special Interest organizations that cater to many students, offering specific needs and interests. ASIA is just one club of many which celebrates diversity, and specifically teaches students about and promotes awareness of Asian culture. Alliance promotes a healthy, supportive atmosphere and campus community for gay, lesbian, bisexual, and transgendered students, faculty, and staff, as well as for their straight allies. Some other Special Interest organizations include the Black Student Union, International Club, Butler College Republicans, and the Butler College Democrats.

Service Organizations

Butler University truly offers students the chance to learn the value of service and philanthropy. Circle K, College Mentors for Kids, and Alpha Phi Omega are just a few of the service organizations that students can join. These organizations enable them to help people and to make a difference in the community throughout the year. Other organizations, such as Fall Alternative Break and Alternative Spring Break, gear toward one big service project. This year, Circle K members participated in events such as leaf-raking, volunteering at haunted houses and soup kitchens, and even coordinated a community baby shower to accept donations in order to benefit the March of Dimes. In addition, College Mentors for Kids allowed students to bond with and to create on-going mentoring relationships with elementary students.

Emily Kolarski, Vice President of Phi Kappa Phi, and President Emerson Weathers, lead their members in reading.

Fine Arts

Many students at Butler University are a student to express their creative personality. Organizations such as MENC, Butler Recording Club, Alpha Psi Omega, Mu Phi Epsilon, Phi Mu Alpha Sinfonia, Kappa Kappa Psi, Sigma Alpha Iota, and Tau Beta Sigma are all groups of students which have members who are extremely devoted to the Fine Arts.

Sophomore Jamie Farvis, a member of Tau Beta Sigma, explained some fun times in that organization. "This year has been the 60th anniversary of Tau Beta Sigma, so we have had many social events for us to get together and celebrate 60 years of service for the hands."

The members of Kappa Kappa Psi at a party in the basement of the Butler University building.

Philosophy Club member, intern, of the year, intellectual discussion, philosophy, and more.

Each student here at Butler University has a unique style with a unique sense of interests. That is why there are various organizations or campus. Not all the organizations are under a certain category. Some of these organizations include the Philosophy Club, Kappa Delta Pi, National Student Speech-Language Hearing Association, Public Relations Student Society Association, Butler University Speech Team, Pre-Law Society, Butler Mock Trial, and the Engineering Dual Degree Program Club. These organizations allow for students to express themselves in many different manners.

Ross

Ross Hall, the co-ed undergraduate dorm on campus, is a great place for freshmen men and women to call home for nine months of the year.

Freshman Macey Bittles has loved her experience so far. "I really love the atmosphere, it's a great place to live because there is always something happening and the staff is great. My RA made my freshman year great, all the RAs are awesome."

The appreciation for RAs continues throughout the hall. Ross Hall is comprised of fifteen units, and each unit has approximately thirty-five students and one Resident Assistant. The units do many activities together which allow the students to become very close. This is very beneficial for the incoming freshmen who many times do not know anyone else on campus.

Freshman Mike Fantone has felt the importance of a strong unit. "My experience in Ross Hall has meant a great deal to my experience at Butler overall because my unit is so close."

Ross Hall also is a place where memories are made that will last a lifetime. Fantone has been very pleased with his time in Ross Hall so far this year. "I was really able to connect with the people around me, forming a lot of great friendships which led to a lot of great moments throughout the year."

Overall, students have found Ross to be a place they can not only call home, but also a place where they can make friendships and memories. The staff is very friendly and always willing to give a helping hand. This provides for a very positive living experience.

Students hang out in their lounge. Photo by Chris Egan

Always having fun...

Year built: 1958

Number of students: 480

Male residents: About 370

Female residents: About 110

Number of rooms: 220

Interesting fact: Ross got a face lift in 2005 which included \$80,000 on new carpeting, a new roof, and a new boiler room.

The staff of Ross Hall are all very committed to work together. Photo by Chris Egan

Freshman Angie Wilson is looking online for information on her computer. Photo by Emily McInerney.

Freshman Megan Knight is watching TV while her tutor, Sharply, Emily McInerney.

Students talking outside their dorm room. Photo by Emily McInerney.

Schwitzer

Freshman Brittany Larse loves living in Schwitzer because of "the friendships made and the memories that'll last a lifetime."

That is what Schwitzer is all about. The women who live in the al-girls, mainly freshmen dorm, have the benefit of making lasting friendships and memories. While most might consider Schwitzer to be a vault of sorts, the Residents Assistants simply try to make the freshmen students' first year on campus as enjoyable and safe as possible.

Freshman Jen Fitzgerald says that she loves her unit. "We all get along well and (my RA) does an excellent job of making us feel at home."

Another great benefit of having an al-girls dorm on campus is that the women are able to communicate in a way that is different than they would men. "There is always someone to talk to," freshman Bethany Rode says.

Freshman Megan Podgorski adds, "I love the great friendships that I've formed in such a short period of time. I feel like I have sisters in my unit."

When asked what her favorite part about living in Schwitzer was, sophomore Danielle Eder, an RA, said, "it's a tough call between playing Schwitz Balls and the laughter of my residents!"

Freshman Becky Hoover also said that she likes Schwitzer because there are "lots of nice girls and it's clean!"

The RA's are getting ready for their weekly meeting. Photo by Emily McInerney.

Freshmen Alicia Fugle and Bethany Walsh hang out in their room watching TV. Photo by Emily McInerney.

Always having fun...

Year built: 1956

Number of students: About 500

Number of rooms: 225

Interesting fact: Schwitzer was built in two phases, the first one was completed in 1956 and the second was completed in 1963.

Senior Kristi Bell sits on her bed in her Butler University dorm room.

Students Kristi Bell, J. Taylor, Kristina Taylor, and others sit together in their dorm room.

ResCo

Butler University's ResCo is the students' ultimate hangout. It is the primary upper-classmen dorm on campus. With its quiet study areas, TV lounge, game room, and kitchen, ResCo is the perfect place to live for those students who know they are at Butler to study, but who still want some time to socialize.

This is senior Alexandna Crumble's fourth year living in ResCo. "My experience has been enjoyable mainly because of my interaction with others," she said. "Often people characterize ResCo as a closed place without much interaction, however my freshman year RA encouraged us to communicate with each other, keep our doors open, lend in on our neighbors, and interact as much as possible. ResCo provides the perfect balance of social and community interaction and also privacy that I needed from time to time."

Freshman Matt Frost agrees with this balance that Crumble talks about. "ResCo extends a high quality of living in which its residents have the ability to achieve high academic success. It's a wonderful place to put all my troubles to rest so that my study time is enhanced."

Junior Tim DeBow likes the ease of living in ResCo. "The convenience of rolling out of bed, throwing on some pants, and shutting over to breakfast can't be beat."

With the perfect mix of convenience, social interaction, and ample study opportunities, ResCo is the place to live for Butler's upperclassmen students who wish to remain on campus.

UT

The University Terrace apartments provide a unique living arrangement for Butler students. Students choosing to live in UT have their own kitchen, which students enjoy. "I like the benefit of being able to cook your own food and not having to eat at Atherton anymore," says junior Enca Hobbs.

Some residents enjoy having more independence. Junior Stuart Thompson says, "The apartment style atmosphere allows us to become more reliant upon ourselves while learning those skills we need to become independent and responsible adults."

University Terrace also has themed floors. The basement is the academic floor, reserved for those with a GPA of at least 3.5 or those in the honors program. Residents are required to participate in three unit programs per semester.

The first floor is the wellness unit. Each resident of this unit is required to make a personal assessment and participate in three unit programs per semester.

The fine arts unit is located on the second floor for those students who have a past or present connection through participation to the fine arts. Students in this unit are required to participate in three unit programs.

Last but not least, the third floor of UT is the community service unit. Residents of this unit are required to complete five hours of community service, one unit project, and one social or community building activity per semester.

Interesting fact: It is rumored that UT used to be a drive-in restaurant, but was rebuilt as a housing unit for Butler.

Alpha Chi Omega members sitting on the ground outdoors.

Two Alpha Chi Omega members sitting together.

Alpha Chi Omega

The Alpha Chi Chapter of Alpha Chi Omega was established on February 28, 1925 with the help of the Beta Beta Beta Alumna chapter. Alpha Chi Omega has since grown and now thrives in the Butler community. This year marks the 100th anniversary of Alpha Chi's national founding and the 80th anniversary of the chapter's founding. Our members continue these on-going traditions by participating in a wide variety of campus activities while striving to attain academic and personal success within the support network of sisterhood.

The organization often earns the honor of being considered the most involved Greek society on campus and maintaining one of the highest sorority grade point averages. This year the women of Alpha Chi Omega won 1st place overall in Geneva Stunts and hope to recapture a Spring Sports Spectacular victory after placing 1st in Octoberfest this fall. In addition, Alpha Chi was able to successfully raise several thousand dollars for the Jital Center through the efforts of Freshen Fling and a silent auction held during Homecoming weekend. Members also frequently donate personal time and energy to working at the Jital Center or Thrifty Threads in order to further the cause of every woman's philanthropy.

The women of Alpha Chi Omega look forward to welcoming the initiates of 2006, and our hope is that they will continue the celebrated tradition of being part of the sisterhood of distinction that those charter members first established in 1925, with the goal of creating a sorority to epitomize the excellence of Butler University and the Greek system.

Alpha Phi

The Epsilon Beta chapter of Alpha Phi was founded at Butler University in 1967. The house on West Hampton Drive was built in 1976. Alpha Phi celebrates the installation of their chapter, known as Founder's Day, on October 10.

Alpha Phi's philanthropy is the Alpha Phi Foundation, which helps to fund research and educational programs for heart disease and cardiac care. The Alpha Phi Foundation was established in 1966 and is one of the oldest Greek foundations.

Alpha Phi has focused on heart disease and cardiac care as a philanthropic priority for more than 50 years. As a result of the research and programs aided by the Alpha Phi Foundation, health care professionals and women everywhere are learning more about the causes, prevention and treatment of heart disease – the number one killer of women in North America.

Bounce for Beats is Alpha Phi's annual thirty-six hour bounce - a - thon, held to raise money for the Foundation. The bounce - a - thon takes place every spring in front of the Alpha Phi house. The women of Alpha Phi, other Butler students and community members bounce on trampolines for the thirty-six hours. Last year, Alpha Phi raised over \$3,500 for cardiac care.

Delta Gamma members celebrate homecoming.

Three Delta Gamma members sitting on a bench.

Delta Gamma

Delta Gamma was founded in 1853 by Anna Boyd, Mary Comfort, and Eliza Vau at the Lewis College in Oxford, Mississippi. Alpha Tau of Delta Gamma was installed at Butler University on October 5, 1925. The chapter's first house was rented in 1925 and occupied until 1936 when a new house that was built for them had been completed. Additions to this house were in 1948, 1963, and 1982.

The original badge of our Founders was the letter "H". The symbolized Hope, which was our Founders' watchword. In 1887, the "H" badge changed to an anchor which is the traditional symbol of hope.

Delta Gamma's motto is "Do Good." They strive to do good by working to raise money for their philanthropy. Their philanthropy is Service for Sight Aid to the Blind. They are fortunate to be able to work closely with the Indiana Blind School. This year they had a very successful Anchor Splash, which is their all campus philanthropic event. The money they raised went both directly to the Indiana Blind School and their philanthropy.

In the summer of 2004, the Alpha Tau chapter of Delta Gamma was named the Division I Runner-Up of the Outstanding Collegiate Chapter Award. Alpha Tau was also awarded the Patricia Peterson Danielson Award. Each Delta Gamma chapter has the opportunity to feel annual recognition as a recipient of the Patricia Peterson Danielson Award, conferred when a chapter satisfies the award criteria which adhere closely to the Fraternity standards for collegiate chapters.

Delta Gamma members are holding a ball at the Delta Gamma house. They are also helping to raise money for the Anchor Splash.

Michelle Ma, Erin, and Kim are members of the Phi Delta Theta chapter at Delta Delta Delta. Photo continued.

Delta Delta Delta

After a 10-year hiatus, the Delta Lambda chapter of Delta Delta Delta officially returned to campus on April 9, 2005. The Tri Delta house, located on Hampton Drive, has been known as the Hampton House for the last decade since Butler rented it from the National Organization of Delta Delta Delta. The women moved into their new home on August 20, 2005. From move-in day and throughout the next few years, many changes and renovations will take place.

Since their installation, the members of Tri Delta have worked incredibly hard and received many honors, including multiple wins in philanthropy events sponsored by other Greek organizations. They also had a very successful first formal recruitment. Paired with Delta Tau Delta, they received the Spirit award in their first ever Geneva Stunts. Delta Delta Delta works in direct partnership with St. Jude Children's Research Hospital. Last spring they raised over \$10,000 with Sincerely Yours letters, ranking them first of all the Tri Delta chapters in the State of Indiana. They plan to have an annual Fall Fajack Attack and a Spring TriDeltathon to continue to raise money for St. Jude. Also, Tri Delta and Sigma Chi plan to pair up annually to hold a Fall Fest for the children of the Kaleidoscope Center.

Members of Delta Tau Delta standing in front of their building, Butler University, Indianapolis, Indiana.

Students around campus come out to support the Delta Tau Delta members.

Member Dennis plays basketball with another member of Delta Tau Delta at the Delta Dunk. Photo by Emily Meyer.

Delta Tau Delta

Delta Tau Delta is a social fraternity "Committed to Lives of Excellence." With more than 75 members, they pride themselves on being a strong organization held together by brotherhood and friendship. During the year, they coordinate and participate in a variety of community service events. In the fall semester they look forward to working with children at the Blind School of Indiana as well as through various projects through BITS and other service opportunities. They also host an all-campus basketball event, Delta Dunk.

The primary philanthropy is Riley Hospital for Children. Each spring, they hold an all-campus fundraiser called "File a Trunk." Through this event, they raise thousands of dollars for the hospital. They also spend the week committing time and energy to work with various children at the hospital. During this week, they also work to reach out to Butler faculty and staff through their annual faculty dinner. This gives members of the Butler community the chance to see, first hand, what a difference Delta Tau Delta is attempting to make. This is an event they look forward to each year. Along with the social events throughout the year, they also strive to focus on academics. They have consistently been above the "all-male" cumulative GPA at Butler and hope to continue this tradition.

Kappa Alpha Theta

Across campus, it is easy to find many women sporting their black and gold, along with their undying Theta pride. In 1872, the Gamma Chapter of Kappa Alpha Theta was established at Butler University, consisting of only six women. Becoming the third established nationwide, Butler's Kappa Alpha Theta is fortunate enough to house both special china, which is unique to only two other chapters, and a red rug displaying the fraternity crest, which is exclusive to the Alpha Chapter and our very own Gamma Chapter.

The main goals of Kappa Alpha Theta are to promote the individual worth of each member; provide the support of lifelong friends, and prepare each member for their quest of excellence. Throughout the year, Theta has pursued these goals in activities throughout Butler's campus and the entire surrounding community.

The women of Kappa Alpha Theta constantly strive for local and national service projects, with Court Appointed Special Advocates (CASA) being their main philanthropy. To raise money for this, they hosted Theta Grill Off which included an all campus softball tournament, a fraternity cheer competition, a Date-A-Theta auction, and a campus grill out. Between Grill Off and donations, Theta managed to raise over \$7,000 for their cause.

Members of this sorority also enjoyed many sisterhood and social events, thus strengthening the bonds of their friendships. They held several semi-formals and formals, as well as going on a Haunted Hayride, going to see an IMAX movie, and several others events.

The unique variety of women in Kappa Alpha Theta and their involvement in various service projects and leadership positions show Theta's support of not only the Greek community, but the entire Butler community as well.

Kappa Kappa Gamma.

Kappa Kappa Gamma is a sorority that was founded at Hampton College in October 13, 1890. Today there are over 151 Kappa chapters. Butler University is home to Mu chapter, as it was founded in January 2, 1958. Eighty-two-one Hampton Five has been home to Kappas at Butler since January 2, 1950. Since our founding date and home groundbreaking, Mu Kappas have continued a tradition of excellence.

The 2000-2006 school year got off on the right start with their annual philanthropic event, Fappa Kickoff. This great event is a campus wide football tournament, which raised over \$2,000 for Gaburi Place. On a rainy day in August, the games, food, and company helped bring the whole campus together. Also in the fall, Mu chapter was paired with Ross Hall for homecoming. They played third in lawn decorations and the cheerleading competition, "I'll Like Her." Mu was also paired with Fosse Hall for the YMCA sponsored event, Geneva Stunts. After hard work and dedication, the Fappas came home with a third place trophy. They also received the YMCA Allstar award for the second year in a row. This award is given out for upholding YMCA values and working well as a team.

Mul Kappas have also been busy having fun. Throughout the year, they had two formals, semi-formals, and other fun sisterhood activities. A Sapphire Ball, their annual formal, was held in November at the grand lobby of the Clatsop's Museum. Mul Kappas had fun times this year, and are looking forward to another wonderful year of memories to come.

Lambda Chi Alpha

In 1909, Warren A. Rie founded Lambda Chi Alpha in Boston, Massachusetts. Six years later, the fraternity was founded at Butler University. The house that now sits across from Hinkle Fieldhouse was completed in 1929, and since then, more than 1,540 men have lived there. Boasting a huge game room, two widescreen televisions, and even their own pool and house movie, Lambda Chi has gone through many changes since its birth.

In the fall of 2005 the men of Lambda Chi Alpha raised a record 113,000 pounds of food for the North American Food Drive, their national fraternity philanthropy. Also in the fall, the men of Lambda Chi Alpha raised a record \$6,500 in their house philanthropy, Teeter-Totteration for the Leukemia and lymphoma Society. The house also placed first in numerous campus events such as Geneva Stunts and Spring Sports Octoberfest.

With a large rush class of 24 men, the future of Lambda Chi Alpha on Butler's campus looks very promising. The house boasts a 94 percent campus involvement rate with many members holding elected positions in those various clubs and associations. Rarely does one house hold so many diverse men who together strive towards a single goal: to serve, advance, and protect the ideas of Lambda Chi Alpha. We are focused on making ordinary men extraordinary by achieving excellence in the form of academics, campus participation, and extra curricular activities. This year has been one of achievement and success, one the brothers are sure to remember for the rest of their lives.

Members of Pi Beta Phi are always ready to help you.

Members of Pi Beta Phi are always ready to help you.

Pi Beta Phi

Pi Beta Phi was founded April 28, 1897 at Mount Holyoke College under the name I. Chionese. Pi Phi was the first national secret society of women, modeled after fraternities Greek letter system. The sorority was founded on Butler's campus in 1897.

The Pi Beta Phi badge worn by initiated members is the arrow with the Greek letters in the wings. The badge is worn over the heart always pointing upwards. The Angel is an unofficial symbol of Pi Beta Phi; the angel became very popular among the sisters. The wine carnation was adopted as the sorority flower in 1890 at a Pi Beta Phi Convention.

Philanthropy is very important to the organization. In the fall Pi Phi holds Arrowspire, a co-ed volleyball tournament, in order to raise money for the Arrowmont School for the Arts and Crafts. Pi Phi supports the American Cancer society by annually holding their Swing into Spring event. For 72 hours there is a Pi Beta Phi swing in the front lawn to raise money. Other philanthropic endeavors are Link's to Literacy, Champions Are Readers (CAR) program, Pi Beta Phi Foundation and Arrow in the Arctic.

Pi Beta Phi is dedicated to friendship, community service, and education. Education is a top priority at Pi Phi; with a 24-hour quiet study room there is never a lack of space to get homework done. Sisters of Pi Phi also like to have fun, with formal and informal dances every semester. Pi Phi also encourages friendship through various sisterhood events.

Members of Pi Beta Phi are always ready to help you.

Always having fun...

Students line up to begin the Phi Psi 5K race. Photo by Emily McInerney.

Phi Kappa Psi

National Phi Kappa Psi was founded in 1853 at Jefferson College in Jefferson, Pa. This university Phi Kappa Psi is unique among fraternities in that it began as a national fraternity from the start, founded on "The Great Joy of Serving Others." Since then, Phi Kappa Psi has grown to over 85 chapters in 32 states and the District of Columbia. The fraternity has one of the largest active memberships and the largest endowment fund of any fraternity.

The Indiana Zeta chapter was founded and colonized in 1969. Throughout the years, the Indiana Zeta chapter has received many highly regarded rewards from the national fraternity as well as a wide range of awards and recognition from the university itself. Recently, the chapter was nationally recognized with distinction for overall excellence in operation of the house including academics, philanthropy, brotherhood, and other standards put forth by nationals. Butler has recognized Phi Psi for its contributions to its philanthropy Hope Lodge and every year Phi Psi puts on a 5K walk/run benefit for Hope Lodge. In 2005, money from the 5K also went to The American Feed Crops, The American Cancer Society, and Tenth East Methodist Children's Day Care. Total contributions from 5K to charity were around seven thousand dollars.

Phi Psi has had a terrific academic year thus far. Having already run a great rush and taken in a number of excellent pledges, Phi Psi is looking forward to completing the semester with new brothers who will surely serve to carry on its traditions of excellence, diversity, respect, and brotherhood.

Sigma Chi

Sigma Chi Fraternity was founded by seven men in June 1862 at Miami University in Oxford, Ohio. The fraternity has since grown to include 218 undergraduate chapters with over 2000 living members. Rho Chapter was chartered in March 31, 1965 at Butler University with an original class of six members. Some notable alumni include Dr. Scott Butler, former president of Butler University, and Brian Gilman, to whom the Irwin Library is dedicated.

Over the past year, Sigma Chi has been active with many philanthropic and social events. Early in the year, the chapter's annual Delta Days raised more than \$2500 for Riley Children's Hospital. Over both Fall and Thanksgiving Break, 15 members of the fraternity traveled to New Orleans, Louisiana, to help in the aftermath of Hurricane Katrina. Later in the semester, Sigma Chi organized a Fall Youth Fest in conjunction with the sorority Delta Delta Delta. For this event, innercity youths are invited to come to campus for an afternoon of fun and games. In the spring, Sigma Chi - along with Delta Gamma - was part of Light Up the Night Against Drunk Driving. Nearly 4,000 luminaries were placed around the campus all ways; it was a spectacular sight. To end the year, the Chad Keuler Memorial Golf Outing was held at the Golf Club of Indiana in Zionsville. The proceeds from the event were donated to the Huntsman Cancer Institute, one of Sigma Chi's preferred charitable organizations.

The past spring, Sigma Chi welcomed 10 outstanding gentlemen into the fraternity.

Members of Sigma Nu are seen at the annual meeting of the Sigma Nu chapter at Butler University.

Members of Sigma Nu are seen at the annual meeting of the Sigma Nu chapter at Butler University.

Sigma Nu

Sigma Nu Fraternity at Butler University was originally established as Delta Phi Sigma on January 11, 1923, and its sole purpose was to petition Sigma Nu Fraternity Inc. for a charter. After building a stellar reputation on campus, a group of 36 young men became the Epsilon Mu chapter of Sigma Nu on May 7, 1926, the same year Butler made its move to the present campus. Sigma Nu became Butler's fifth national fraternity.

Sigma Nu's motto is "Love, Truth, Honor" and Epsilon Mu remains true to these values as they remain strong in their dedication to being a strong brotherhood that stresses individuality. As a chapter, they are proud of their academic prowess, having attained the highest fraternity GPA for four of the past eight semesters, and having never been outside of the top three. They also pride themselves on their philanthropic endeavors, including Gentlemen's Day, Habitat for Humanity, Special Olympics, and the annual powder puff football tournament, "World Vision Bow" which benefits World Vision International. Having one of the strongest pledge classes in the spring of 2006, Sigma Nu now looks forward to being the host chapter of the Worldwide Sigma Nu Grand Chapter in June.

Tau Kappa Epsilon

The Gamma Psi chapter of Tau Kappa Epsilon has been a part of Butler since 1951. Ever since that time has been active on the campus has to offer. This past year, the Gamma Psi chapter welcomed the 18th largest TKE recruitment chapter in the nation. This fresh influx of members has brought new life into the chapter and has allowed us to be involved in even more activities. You will find TKEs participating in football, golf, cheerleading, etc. Out of the Dawghouse, SGA, and many other organizations. They are very involved with their philanthropy, the Alzheimer's Association. Each year they hold an Iron-jump-a-thon in which TKE brothers jump on a trampoline for 24 hours a day an entire week. They pride themselves in their brotherhood and it is this closeness that makes them strong. Every member of the house respects, cares, and contributes in the best way he can to the house itself and every member in it. It is this way that they grow. They follow the traditions that have been set by previous members. Whether it is passing on the history of their fraternity, charity work, or even hanging Christmas lights, they accomplish goals together.

Senior Ben Chubb plays guitar while commuting. Photo by Stacy McGuire.

Commuters

Commuter students this year faced a challenge that is nothing new to those living off campus parking. The problem of finding a spot to park while arriving at class on time is a daily struggle to those who choose not to live on campus. Getting a good parking spot means getting to campus early, but this is not an option for everyone.

Getting to campus early means getting a close parking spot and is a small reward for those who have to wake up early for an 8 a.m. class or have morning practice for athletics.

Sophomore Laura Ellis says she "doesn't really have to deal with parking" simply because she returns to campus from crew practice at 7:30 a.m. Plus, she says, "After being a commuter student for a while, you figure out where your regular haunts are." Commuters find places around campus where they can study, relax, meet with people, or even take naps. Having a morning class and an afternoon class broken up by a three-hour gap could easily mean time to meet with some friends at Starbucks or a study session in the library.

The construction of the new apartment village for the 2006-2007 school year could have a positive effect upon commuters. More people living on campus and taking advantage of residence halls parking means a greater amount of parking for commuters.

FLIGHT Students take a break from the morning activities Photo by Emily McInerney

Students at the University of Maryland, College Park, are taking a break from their morning activities to enjoy a flight. The flight is a special event that is held every year. It is a chance for students to relax and enjoy the outdoors. The flight is a great way to spend the morning. It is a chance for students to enjoy the outdoors and to relax. The flight is a great way to spend the morning. It is a chance for students to enjoy the outdoors and to relax. The flight is a great way to spend the morning. It is a chance for students to enjoy the outdoors and to relax.

ADVISING

"Walgreens has given me the opportunity to practice what I've been trained to do—counsel patients and help improve lives."

Looking for the right opportunity to grow your pharmacy career?

Where, first and foremost, a pharmacy company run by pharmacists. Our top priority—like yours—is about improving quality of life through personalized, professional patient care.

Our "pharmacy-first" philosophy offers you tremendous opportunities to enrich your career by working directly with your patients and providing valued patient-care service.

State-of-the-art technology and team support - Our online tools automate tasks to promote efficient workflow, and certified pharmacy technicians create a team environment, allowing you to grow as a pharmacist.

Growth and career opportunity - Walgreens is one of the nation's fastest growing drugstore chains with plans to operate over 7000 stores by 2010. Every year, we promote about 500 new pharmacy managers from within the company based on performance.

Financial stability - We lead our industry in sales and profits with over 30 consecutive years of record sales and earnings.

Benefits for a secure future - Competitive salaries, excellent benefits and lucrative Walgreens stock retirement plans offer the potential for a secure financial future. Here looking for team players to take on important roles in our company. As a Walgreens pharmacist, you will have the opportunity to make a difference in the lives of your patients.

To learn more about what Walgreens can do for you, go to: www.walgreens.jobs
Or call toll-free: 1-855-367-5592

We welcome individuals of diverse talents and backgrounds. We are an Equal Opportunity Employer. Walgreens promotes and supports a drug-free workplace.

The Best of Butler

Two young women, the
 friends of the author,
 who have been friends
 since they were in
 middle school. They are
 now in college and are
 quite successful in their
 studies. They are also
 very close friends and
 often talk about their
 future plans. They are
 both very smart and
 hardworking.

With the help of the
 school board, the
 students have been
 able to raise the
 money for the
 building.

serves as the "Alma Mater"
during "Alternative Spring"
Break. Photo by Eric Gray.

In the Gallery of Memories
There are pictures bright and fair
And I find that dear old Butler
Is the brightest one that's there
Alma Mater! How we love thee!
With a love that ne-er shall fade
And we feel we owe a debt to thee
That never can be paid!

The Gallery Staff

The production of this, the second volume of *The Gallery* began in June 2005. Less than a month after the final pages of the 2005 yearbook were sent to the printer's, the Editors-in-Chief of the 2006 *Gallery* began laying out the content and selecting the book's theme. From August 2005 until June 2006, the staff worked hard designing pages, taking pictures, and correcting proofs in order to get the book completed on time.

This year's staff faced far fewer challenges than last year as Rebecca Wald-Stoker stepped in as the new adviser of *The Gallery*. Overall, the staff put together a book that generally meets the standards defined in the first volume of the *Gallery*.

The Gallery

2006

Volume 2

The second volume of "The Gallery" was created by a staff of student at Butler University in Indianapolis, Indiana. They operated out of a year-round office in Arlington Heights, IL. The office phone number is (312) 940-9550. The book was published by students at 1511 Highway 48, Carrollton, Tennessee, 37040. Mike and Lucie Louch served as Butler University's Jostens representatives. The Theme, *Celebrate*, was chosen in June during a yearbook workshop that was held on Butler's campus.

The book was produced using Adobe InDesign Creative Suite. Layouts and copy were created using a Dell Optiplex GX270, which the staff affectionately refers to as Phett. The staff was advised by Fehenna Vlad-Stoler.

Album portraits were done by MUM Photography. The photographer was Jim M. Adams.

Page designs were created by the appropriate section editors. Dividers were designed by the Editors-in-Chief. All other spreads were designed by the staff members named.

Fonts and sizes varied throughout the book. Thematic fonts included A1 T Cheers! type and A1 T Tick-tock.
